PROJECT FACTS

PROJECT NAME New Keohane 4 Residence Hall	OWNER Duke University
OWNER Duke University	COMPLETION DATE January 2012
PROJECT LOCATION Durham, NC	CIVIL ENGINEERING Stewart Engineering
SIZE 75,000 sf	CONSTRUCTION MANAGER Skanska
USES Residence Hall	PHOTOGRAPHER Robert Benson

The New Residence Hall completes the fourth side of Duke's Keohane Quadrangle

FOSTERING COMMUNITY AND CONNECTIONS TO CAMPUS

This 150-bed residence hall for Duke University introduces a new model for student housing on Duke's historic campus. With large, two-story common rooms, the residence hall encourages social interaction and fosters a strong sense of community within the new 60-person "houses."

Completing the fourth side of the existing Keohane Quad, the project connects the dorm to the rest of campus through an elevated pedestrian bridge. The design carefully maintains heavy foot traffic routes and acts as a gateway to the lower Edens dorms.

Opened in January 2012.

Large bay windows bring light into the house common rooms

A common room entrance with a large glass facade welcomes people into the building

A pedestrian bridge connects the upper levels of the new dorm to other parts of campus
